

Setup IE SSL VPN with 2fa OTOP authentication of IE account

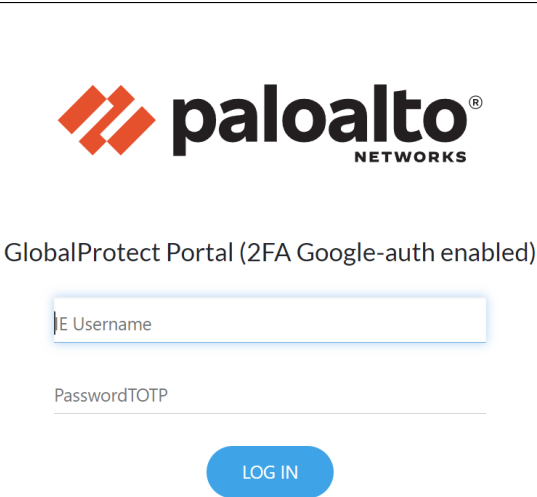

Updated 2025/3/4

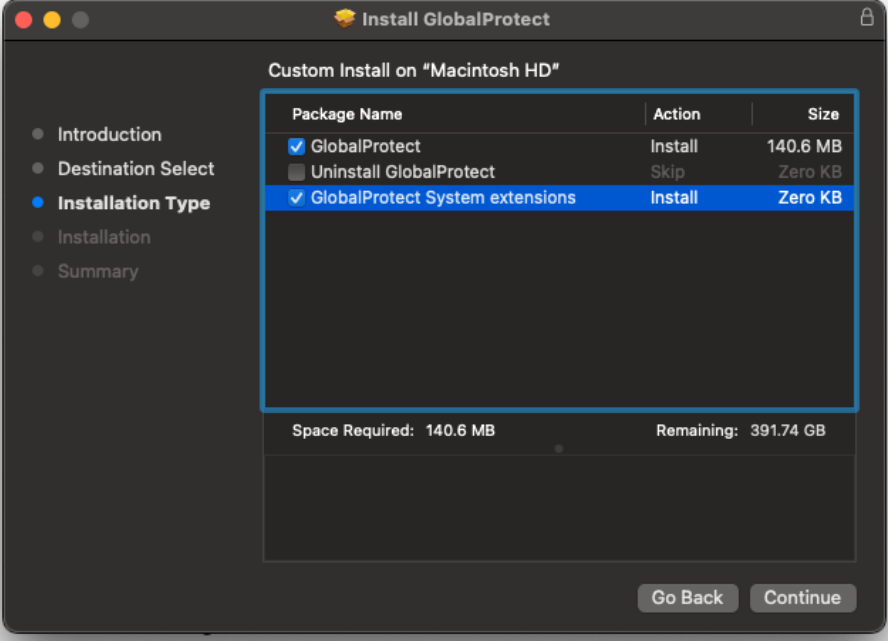

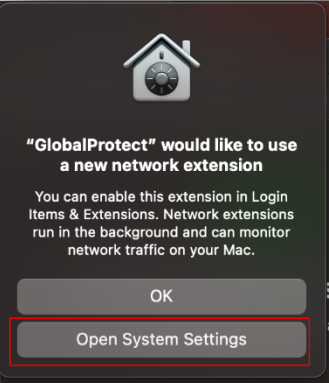

- Login IE 2fa portal to register the 2fa OTOP google authentication in your phone if you haven't done that before

Install CUHK Duo Mobile app on your phone if you haven't done that before https://www.itsc.cuhk.edu.hk/images/content/privacy-security/2fa/DUO_2FA_UserGuide.pdf	
Within CUHK network, go to https://2fasetup.ie.cuhk.edu.hk/ssh/host/ Enter your IE username (eg: ctm024, abc124, etc) and password in the popup box	
Copy, paste and run the below command at the command prompt: <code>/usr/local/bin/2fasetup.sh</code>	

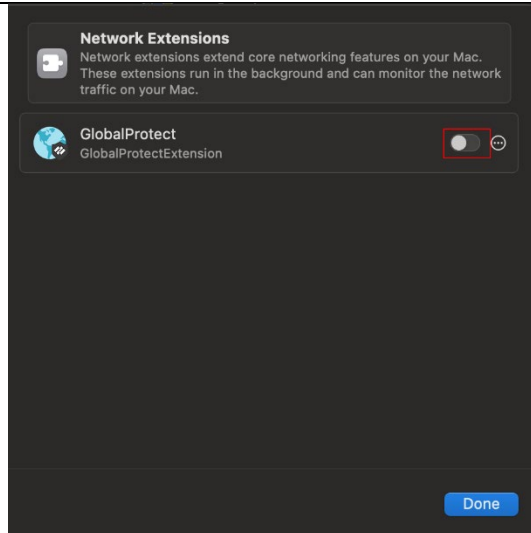

Use your DUO mobile app to add and scan the displayed QR code	
Record the emergency codes in case your phone is not with you for OTO authentication. Scratch codes are for emergency use when you cannot access 2FA codes through other means. Scratch codes will not expire, but each code can be used only one time	

- Setup and Install GlobalProtect Client on your Windows/Mac machine

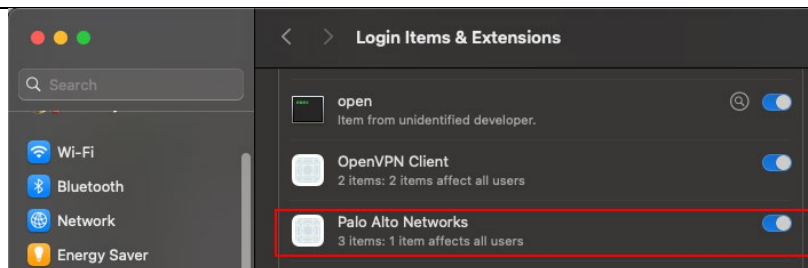

If you have already installed GP client and setup of CUHK VPN according to ITSC instructions, you can skip and go to next step. Go to https://sslvpn.ie.cuhk.edu.hk and download the GlobalProtect client Pls note that your need to append the TOTP code generated from the Authenticator app when entering IE password	
---	---

Download Windows/Mac GP agent according to your platform	GlobalProtect Portal (2FA Google-auth enabled) Download Windows 32 bit GlobalProtect agent Download Windows 64 bit GlobalProtect agent Download Mac 32/64 bit GlobalProtect agent Windows 32 bit OS needs to download and install Windows 32 bit GlobalProtect agent. Windows 64 bit OS needs to download and install Windows 64 bit GlobalProtect agent. Mac OS needs to download and install Mac 32/64 bit GlobalProtect agent.
If you install the Mac GP client, you need to enable the GP network extension in the System Settings	 

In the Network Extensions, enable GlobalProtect

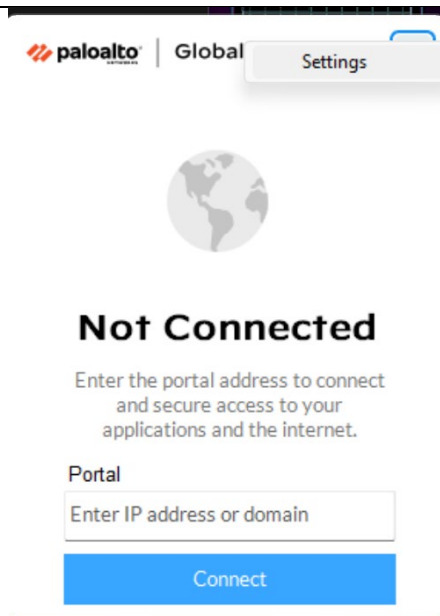

After installation, in system settings->Login Items & Extension. Make sure GlobalProtect (older GP version) or Palo Alto Networks (GP version 6.3 or above) are checked

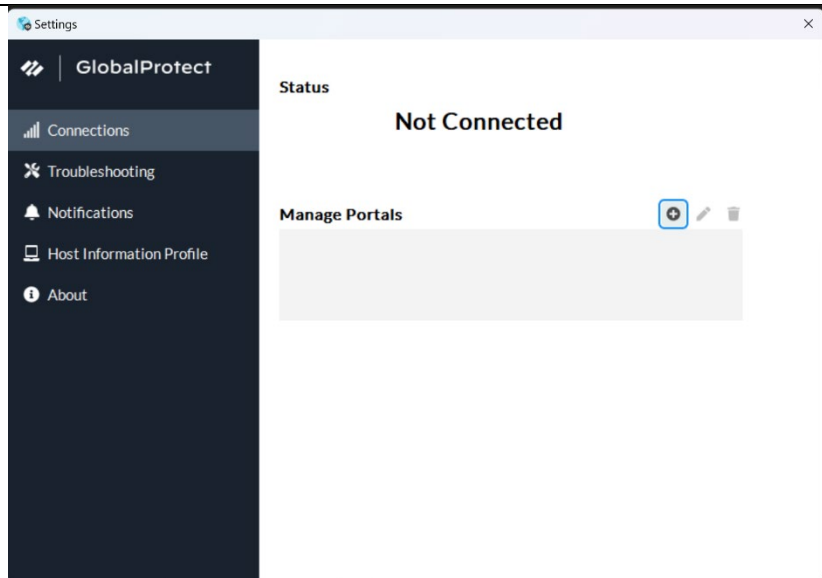

- Configuration of GlobalProtect client

Launch GP client and click the settings button

Click the + button to add a new portal

Enter **sslvpn.ie.cuhk.edu.hk** as the Portal Address

Add Portal Address

Enter Portal Address

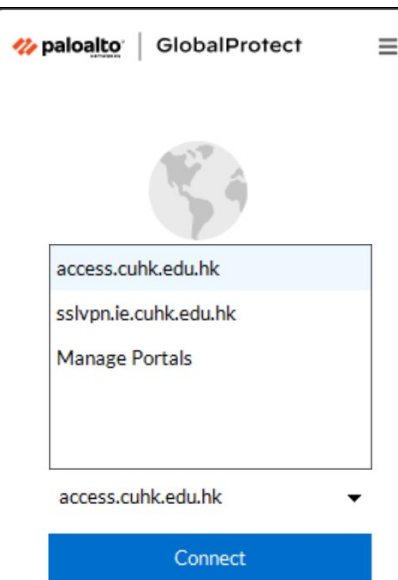

HK he hike

sslvpn.ie.cuhk.edu.hk

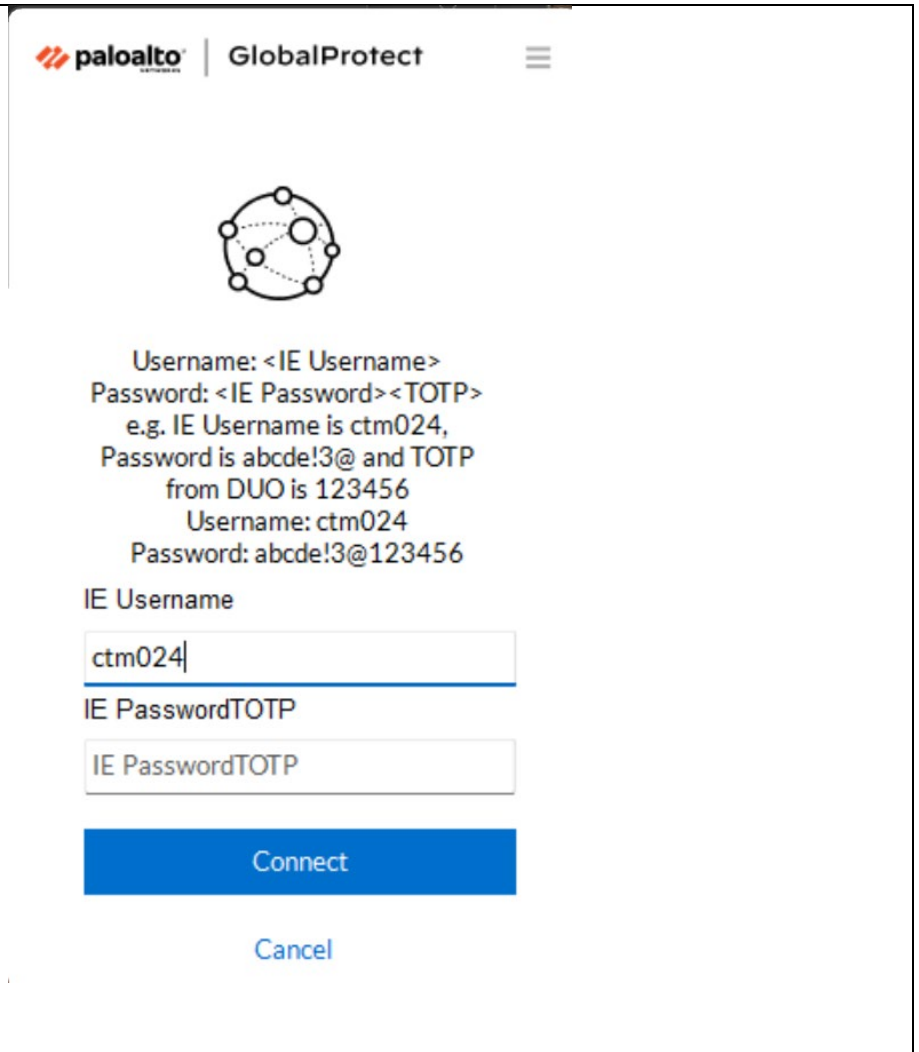

Add

Cancel

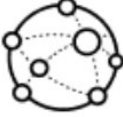

Select **sslvpn.ie.cuhk.edu.hk** in the drop down box to connect

Pls note that your need to append the TOTP code generated from the Authenticator app when entering IE password

paloalto | GlobalProtect

Username: <IE Username>
Password: <IE Password><TOTP>
e.g. IE Username is ctm024,
Password is abcde!3@ and TOTP
from DUO is 123456
Username: ctm024
Password: abcde!3@123456
