

CSCI2100 LAB VPN SETUP and vcenter portal login guide

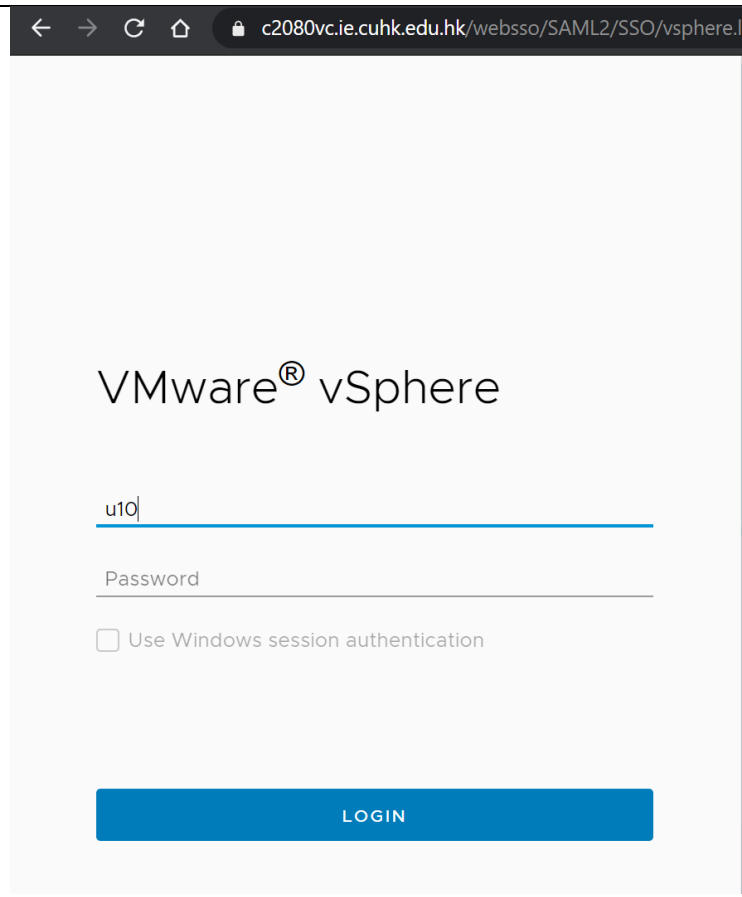

Updated at 7 Sep 2023

CUHK VPN setup

- If you are outside CUHK network or haven't installed CUHK VPN client on your machine, please follow ITSC guide to install CUHK VPN (<https://www.itsc.cuhk.edu.hk/all-it/wifi-and-network/cuhk-vpn/>) before proceeding.
- Login CUHK VPN to connect to the CUHK network afterwards.

Connect to the vcenter portal and login to the Ubuntu VM

Login to the vcenter portal according to the login username (eg: u10) and login url sent to you in the 2100 course account memo (For username below u91 use <https://c2080vc.ie.cuhk.edu.hk/ui/> else use <https://c2080vc2.ie.cuhk.edu.hk/ui/>)

Password

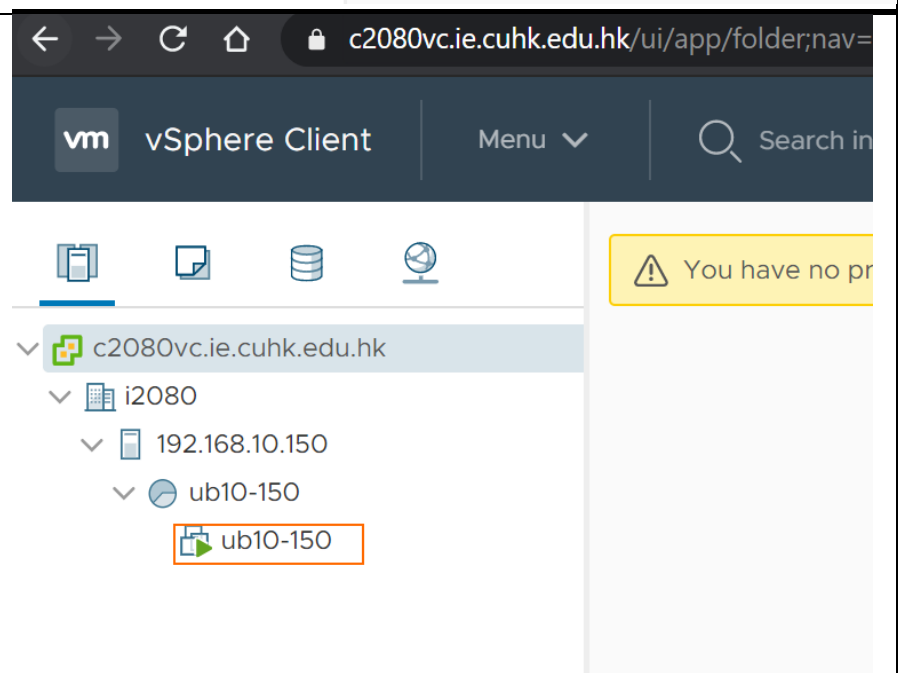

☐ Use Windows session authentication

LOGIN

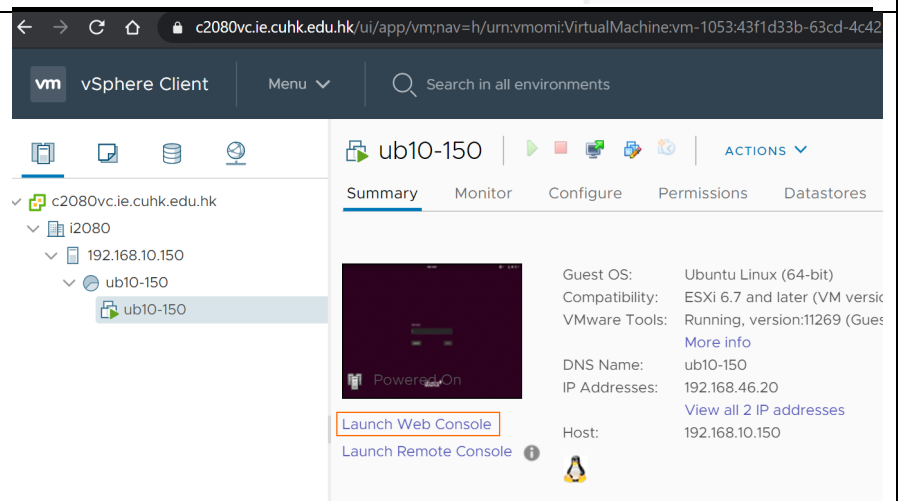

Double Click i2080 icon to expand the content (you will see you have no privileges to view the this object the right. Just ignore it and double click)

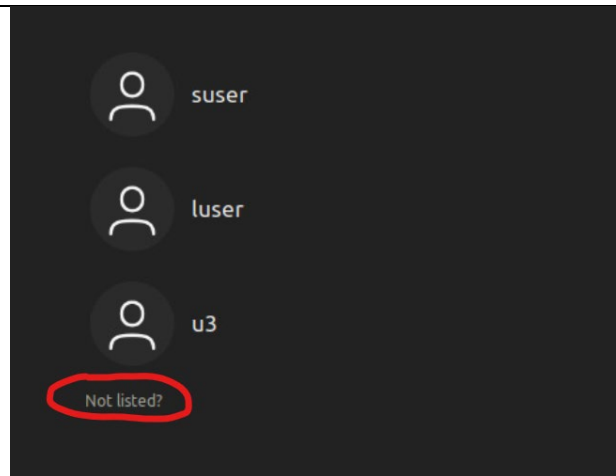

Continue to navigate objects (*double click*) at the left pane and you will discover your assigned delicate Ubuntu VM (ub10-150 in this case). Click on it and you will discover the content refreshed at the right plane.

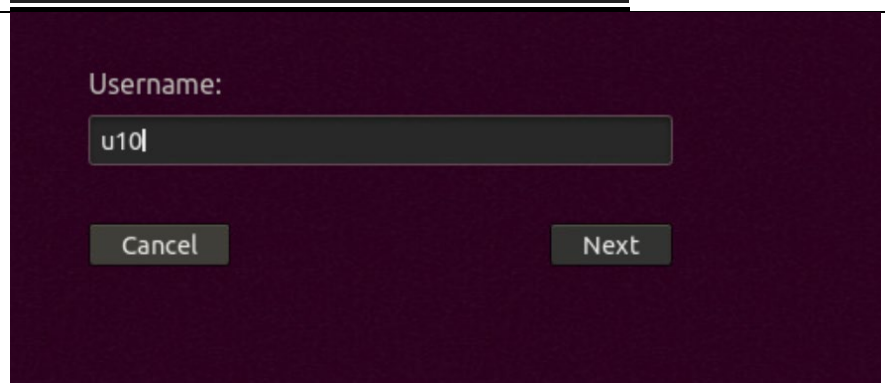

Click 'Launch Web Console'

Click 'Not Listed?'

Login with your assigned Ubuntu username and password

After login, you are presented with the Ubuntu Desktop. You can now follow the CSCI2100 Course materials to proceed
