

HTML Assignment

Exercise 1: Create an HTML page for the following notification as shown in the following schematic *including the outer frame*:

Community College (Autonomous) HKUSPACE Division of Engineering and Technology <u>Seminar on - Web Programming</u> The Division of Engineering and Technology, in its continuing effort to impart knowledge on the latest topics to students, is arranging the following seminar on web programming. Date : 28 Feb, 2028 (Saturday) Time : 4:00 p.m. Speaker : Professor (put your full name here) Venue : College Grand Lecture Theater College Officer

Exercise 2: Create an HTML page for the following chemical and mathematical expressions (you may need to look up special HTML codes for making some patterns/symbols. No additional tools, plugins, add-ons and scripting are allowed (e.g. Math Jax):

$$\sinh z = \frac{1}{2} (e^z - e^{-z})$$

$$\tan\left(n - \frac{1}{2}\right)\pi = -\frac{1}{2\pi}$$

$$\int \frac{1}{ax+b} dx = \frac{1}{a} (\log|ax+b|) + c$$

Exercise 3:

Write an HTML document to show the following content:

CC's library has the following resources:

1. Motion Pictures
 - Avatar
 - Spider Man
 - Big
 - JUMANJI
2. Education
 - Electrical Engineering
 - A. Part I: Thevenin's Theorem
 - B. Part II: Superposition Theorem
 - C. Part III: Ohm's Law
3. Cultural
 - Pop Singers
 - i. Janet Jackson
 - ii. Michael Bolton
 - iii. Michael Jackson
 - iv. Rick Astley
 - v.
 - Pop Music
 - a. Canton Pop
 - b. K-Pop
 - c. J-Pop

Exercise 4:

Write the frameset tags and frame tags for the following frameset. Each of the frames should contain an HTML page having external links to the corresponding topics after clicking the link by user (e.g. a related page from Wikipedia). Colors and text (name of html file) should be applied/included for distinguishing each of the HTML page from others. You may use *traditional frame* or *iframe* for creating the webpage. A schematic layout of the page (Main.html) is shown as follows.

Sociology.html	JavaScript.html	ArtificialIntelligence.html
Biology.html		Chemistry.html
Engineering.html		
Psychology.html	CSS.html	ComputerScience.html

Exercise 5: Create an HTML page that represents a telephone bill as follows:

Customer Bill				
<u>Subscriber's Name & Address:</u> K. Shelly, 4/45 FOURTH STREET, SHANTHI NAGAR, TIRUNELVELI 627002.				Account No: PL 000001
				Billing Day: 22 Feb, 2022
				Amount Due: HK\$188.00
LINE NO.: xx778822		CONNECTION: VoIP	TYPE: Residential	AutoPay: Yes
RATE: 0.80	CALLS: 99	CHARGE: 76	MISC: None	● PLEASE PAY BEFORE DUE DATE TO AVOID DISCONNECTION ● E.& O.E. PLEASE SEE OVERLEAF FOR CODES / INSTRUCTIONS

~The End~
